Paper 3

CHEMISTRY - (Practical)

Mar. 2022 - 21/4 hours

Name	Index Number
Candidate's Signature	Date

Instructions to candidates

- (a) Write your name and index number in the spaces provided above
- (b) Sign and write the date of examination in the spaces provided above.
- (c) Answer all the questions in the spaces provided in the question paper
- (d) You are **not** allowed to start working with the apparatus for the first 15 minutes of the 2½ hours allowed for this paper. This time is to enable you to read the question paper and make sure you have all the chemicals and apparatus that you may need.
- (e) All working must be clearly shown where necessary.
- (f) Non-programmable silent electronic calculators and KNEC mathematical tables may be used.
- (g) This paper consists of 8 printed pages.
- (h) Candidates should check the question paper to ascertain that all the pages are printed as indicated and that no questions are missing.
- (i) Candidates should answer the questions in English.

For Examiner's Use Only

- You are provided with:
 - Solution A: 0.10 M solution of a monobasic acid A;
 - Solution B: Sodium hydroxide solution;
 - Solution C: containing 10.0 g of acid C per litre of solution.

You are required to:

- Standardise solution B using solution A;
- Determine the number of moles of sodium hydroxide that react with one mole of acid C.

PROCEDURE I

Table 1

(a)

Fill the burette with solution A. Using a pipette and pipette filler, place 25.0 cm³ of solution B into 250 ml conical flask. Titrate solution B with solution A using phenolphthalein indicator and record your results in Table 1. Repeat the titration and complete Table 1.

- 3. You are provided with **solid E**. Carry out the following tests and record your observations and inferences in the spaces provided.
 - (a) Place all the solid E in a boiling tube. Add about 10 cm³ of dilute nitric(V) acid, warm the mixture and then allow to stand until all the solid dissolves. Add about 10 cm³ of distilled water to the solution and shake. Retain the solution for tests (b) and (c).
